**MAXIMUM PERFORMANCE
WITH ONE EXTRA QUALITY:
THAT OF BEING ISEO.**

ISEO[®]
UN MONDO PIÙ SICURO
iseo.com

Performa

HOW IT PERFORMS.

IT'S EUROPEAN.

PERFORMA by ISEO has been conceived and developed to meet the requirements of the European market by adopting two different

centre distances: 85 and 92 mm. It can be operated by an European profile cylinder with straight or 45° projecting cam.

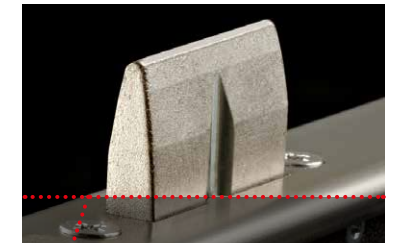

EASY LOCKING.

The gear box allows for a smoother and **easier operation whilst turning the key during opening and closing.**

IT'S SOLID AND WEATHER SEAL COMPRESSED.

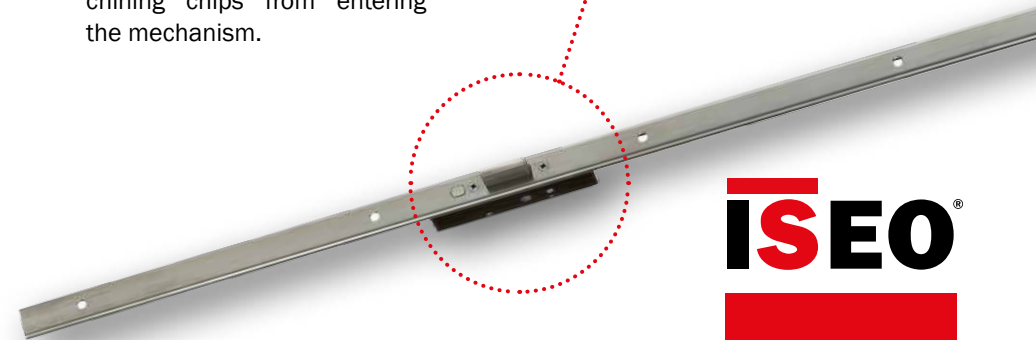

The top and bottom lock housings incorporate low friction chamfered sliding deadbolts providing a perfect alignment into the keeps. It helps maintain weather seal compression for better thermal insulation and energy saving.

Version with hardened deadbolts available on demand, providing greater resistance against cutting and drilling.

IT'S SEALED.

The lockcase is closed on all sides: this stops profile machining chips from entering the mechanism.

ISEO[®]

A WINNER IN TESTS.

It has been designed and tested according with European standards:

prEN15685 (multipoint version)

EN12209 (lateral version)

EN14846 (electric version)

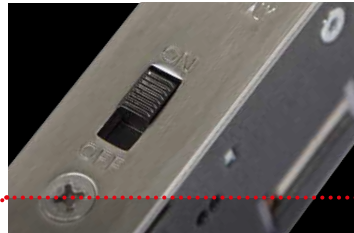

ELECTROMECHANICAL PERFORMANCE.

The electric version has the "hold-open" function, which can be set by switching the selector placed on the lock front plate. All the locks of the range PERFORMA are equipped with a wheel-cam stopping device in case the cylinder is not present into the housing of the lock.

■ **RESISTANCE:** it resists lateral forcing with a thrust of over 1,000 kg and a front load of over 600 kg. The corrosion resistance is more than 240 hours in a saline environment.

■ **ENDURANCE:** tested to over 200,000 opening and closing cycles under load.

■ **OPERATING FORCES:** the soft feel cylinder action with low operating forces to turn the key is well below the average.

IT'S WELL EQUIPPED.

As in the best tradition of Iseo, PERFORMA is well equipped with

accessories to modify the same lock:

with latchbolt, roller or deadbolt only (mechanical version). Such a versatile lock makes for streamlined stockholding.

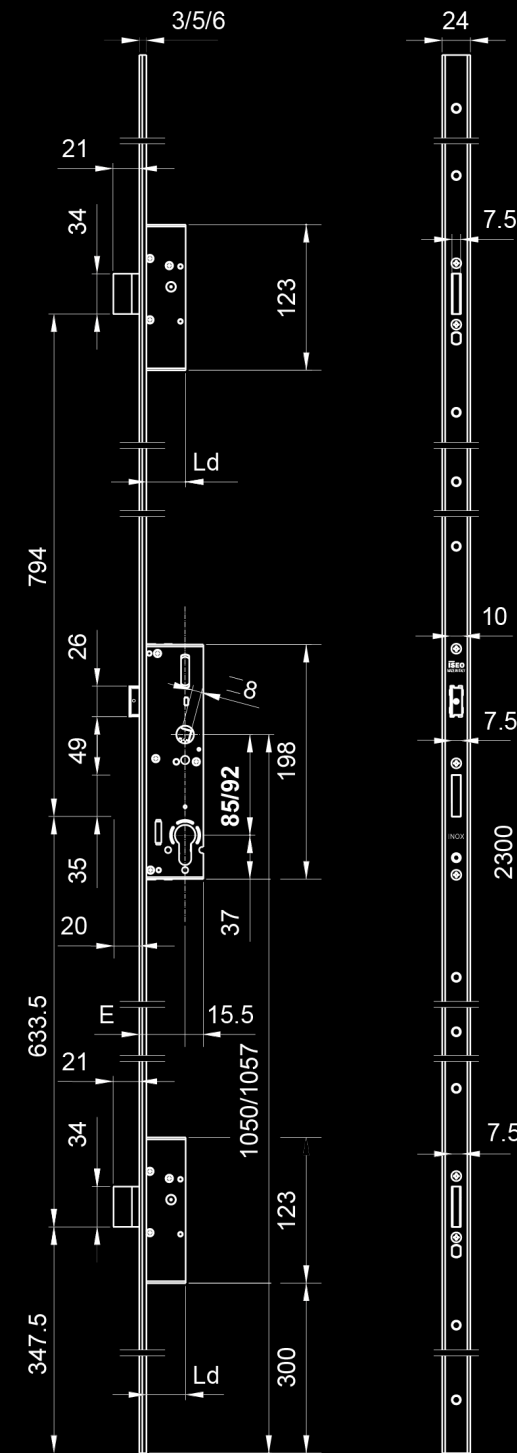

IT'S COMPATIBLE.

The lockcase has a width of 15 mm

and, therefore, suits any type of applications on different frames, in particular on the latest generation ones.

CARE FOR DETAIL.

The front plate is made of coated steel or stainless steel while the latchbolt, roller and deadbolt are nickel-plated.

COMPLETE RANGE.

Thanks to the different versions available, PERFORMA meets all the comfort and security needs.
